### What is the Cornell method?

The Cornell method is a structured note-taking system that allows you to organise your notes to facilitate review and self-assessment.

It involves dividing the note page into **three sections**:

1. a note-taking area
2. a cues/questions column
3. a summary space.

## The Cornell method

### Taking notes with the Cornell method

#### Prepare Your Page:

- **Divide it into three sections** - the Cue column on the left, a larger Note column on the right, and a Summary area at the bottom.

#### Note Column:

- Use the Note column to jot down **main ideas, details**, and other information during a lecture or while reading.
- Try to stick to **key terms, short phrases, or concise sentences**.

#### Cue/Question column:

- Write down **questions/prompts** in the cue column based on the notes you've taken or any keywords, main ideas, and study prompts.
- Add to this either **afterwards** or **during a review**.
- These cues serve as **prompts for active recall** during revision.
- Use these questions later to test yourself.

#### Summary:

- At the bottom of the page, **summarise your notes**, encapsulating the key points and insights in a few sentences.

#### Review:

- Use the **Cue column** to test your **recall of the notes**, covering the **Note** section.
- Try to recall as much information as possible.

### When to use the Cornell method

- Ideal for **integrating seminar** and **study notes**.
- **Encourages you to develop your summarising and synthesising skills**.
- Applicable in any **lecture or seminar setting**.

### Advantages of the Cornell method

- **Organised structure:** The layout supports an organised approach to notetaking, helping you easily categorise and retrieve information later.
- **Enhanced recall:** The "Cue / Question Column" provides a quick way for self-testing and memory reinforcement.
- **Summary skill:** Writing summaries encourages synthesis and evaluation, making the process not just about capturing information but understanding it.
- **Review-friendly:** Because it's so structured, reviewing your notes is a breeze.
